

THE GLEICHEN CALL

VOLUME XXVIII NO. 14

GLEICHEN, ALBERTA, WEDNESDAY JUNE 20, 1934

SUBSCRIPTION \$2.00 PER YEAR

STANDARD DISTRICT ASKING FOR GRAVEL HIGHWAY

Some day there will be a gravel road running north and south connecting the Calgary-Gleichen highway with the Drumheller road, known to old-timers as the "pole line."

Whether it will run straight north from Tiede's Corner, through Rockyford, and on to the "pole line" or run mainly north, through Standard and Redland, to the "pole line" remains to be seen. Much will depend on the outcome of the apparent scrap between two factions of the councillors of Grasswood Municipality.

An attempt was made last week's meeting of Blackfoot Municipality to involve this municipality. Came from the north to attend last week's Blackfoot councillors meeting were Councillors Barr and Larsen of Standard and Jens Rasmussen and N. P. Nelson, of Standard. The latter was eloquent with his arguments for the improvement to go through Standard. Councillor Barr lives near Redland. Other Councillors of Grasswood live near Rockyford and, of course, are for the Rockyford plan.

From all that can be learned the visitors received little encouragement from Blackfoot, most, if not all, this board feeling that the road through Rockyford and eventually on through to Carbon, is the more logical road, from an engineering standpoint and from the standpoint of service. The committees at Carbon call for this road.

Blackfoot municipality's northern boundary runs through the north-western quarters of a mile from Standard. In 1930 Blackfoot graded the four miles north from a point on the east and west highway, immediately south of Standard. In 1933 the cost of maintaining this four miles was about \$8 a mile. Comparing this with a cost of over \$100 a mile for maintaining the gravel road from the 12 mile corner to Gleichen in 1933, makes a contrast that will have a most decided influence in affecting any further decision is made by Blackfoot.

It was pointed out that travel in this part of the province is mostly east and west; not north and south. Residents hereabouts want improvement to Calgary. Therefore, members of the Blackfoot council feel that the next road improvement should run east from the 12 mile corner to Husar. They believe this would serve a far greater number of people than either of the north and south roads mentioned.

MISS M. BOLINGER'S PUPILS GIVE MUSICAL RECITAL

The home of Mr. and Mrs. Marcus Bolinger was the scene of a musical recital. Miss Mildred Bolinger, who has been teaching many of the local pupils had arranged for all the parents and friends to be present when her various pupils rendered a number of selections each.

Little Pauline Sutermeister opened the program playing "Lucky Locket." Agnes Boyd then played "Sing, Rob, Sing." The program continued with Dorothy Bogie playing "Carly Locks" and "Russian Dance"; Mary Downey followed with the "Bicycle Waltz"; Lorraine Greer with the "Ghosts in the Chimney" and "Dance of the Teddy Bears"; Patricia Swain played "Song of the Keeper"; Mary Downey "Little Boy Blue"; Jack Hamar "Sweet Clover." A duet followed then played by Gertrude and Jimmie Swain, entitled "The Taps." "Harp Sounds" was then played by Bernice Krause; "In the Meadows" by Gertrude Desjardine; "Minuet in G" by Jimmie Swain; "The Return of the Regiment" by Bernice Krause; "Intermezzo Caprice" by Gertrude Desjardine; "Marcia" by Alice Krause. The closing number was entitled "Under the Mistletoe" and was played by the two sisters Alice and Bernice Krause.

Miss Mildred Bolinger was presented with a lovely bouquet of roses and gladioli, her youngest pupil, Pauline Sutermeister, making the presentation. The recital was certainly a success and the teacher is to be complimented upon her efforts to give the pupils a thorough and well founded knowledge of music. Every one enjoyed the recital very much.

ROUND-UP NEXT WEDNESDAY WILL BE A REAL THRILLER

GETTING READY FOR THE BIG SHOW MAKES MUCH ACTIVITY AT FAIR GROUNDS FENCES AND TRACK REPAIRED

Next Wednesday afternoon, beginning at 12 o'clock Gleichen's first Round-up will get underway and from then on till the early hours of next morning there will not be an idle moment for those who come to see. In fact it is going to be the biggest and fastest day's sport that has been staged here for many a year. Those who have charge of the Stampede are extremely busy getting the field into shape and rounding up the stock to be used. Horses are coming from all over the country and among them are some of the country's worst outlaws. The riders will surely have to do their stuff to stay on board.

Sunday afternoon the Roundup management rehearsed their part with a real stampede and gained some insight into the problems of putting the events over in quick style. Some fifty auto loads of people were present and gave their approval of some of the horses that will be used next Wednesday. Many a rider found himself claxing the air and a moment later had taken up a homestead and went into the farming business.

The Stampede committee have the municipal's big grader, and are getting the track into good shape. For the they are rebuilding corrals in order to make fast work, and give the spectators a thrill every moment of the afternoon. They will have all kinds of bad horses and range steers for the contestants to work over and they have also added a lot of extra races. The Committee's motto is "Not a dull moment."

The midway with its balloons, fancy acts, blankets, hot dogs, ice cream and pop booths will be looked after by the popular Meadowbrook baseball club.

A wrestling bout to be held in the rink, insures all spectators with an excellent view. The performers are the principals in main features in Calgary and other large cities, and as a good many people around here have never seen a performance of this kind, a real treat can be looked forward to.

The big dance at night, with Len Davis Orchestra, will wind up a perfect day. The dance committee have a straight price of only 50c, and as they expect a very large crowd they have made any provision for children. Don't forget the big day will start at 12 o'clock noon, with cowboys and cowgirls, chuck wagon and what you have, on the Main Street, doing their stuff and believe us the O'Brien crew, always assure you of a good many laughs.

A stampede atmosphere should be created this week by the executive of the Athletic Club. Treasurer Pinneau could wear a ten-ballon hat, a yellow neckerchief, and a pistol. R. S. McQueen would look fine in a pink shirt, riding boots and a hat to match. Joe Guttman, the club's president would look very becoming in a pair of chaps, Mexican spurs and side arms. Joe could also carry a saddle around with him. Bob Brown, Cy McKay and Bob Harrison could wear either buckskin or banded vests, colored shirts, ten gallon hats and carry lariats or bridles on their arms.

THE WEEK AT OTTAWA (BY F. W. GERSHAW)

If Canadians are only permitted to grow the amount of food products that they themselves can consume disaster faces the farmers of the west. Although the difficulty of finding a market is real yet there are signs of the clouds clearing.

France once purchased 30 million bushels of Canadian wheat annually. Now she is exporting and has a duty of \$1.14 against our wheat. Her representative said at home a few days ago that she would reduce her wheat acreage and lower the barriers. If there was more buying of her products by the wheat exporting countries.

LOCAL FARM WOMEN HEAR ADDRESS REGULAR MEETING

The Gleichen U.F.W. and U.F.A. met at the home of Mrs. Callings when twenty three members were present.

The song "Smile a While" was sung. The roll call was answered by embracing moments. The sick committee reported that Mrs. Scriber was ill and a letter of best wishes was sent her. Mrs. Thos. Wilson is much improved in health and may now receive visitors. Master George Bell (Bunney) who recently underwent an operation for appendicitis in the Holy Cross hospital is reported as doing well.

One of the highlights of the afternoon was an address given by Mrs. Wyman in a quiet but pleasing manner. Mrs. Wyman spoke briefly on state medicine. She also touched on the U.F.A. paper now being published every Friday with news of the province, Dominion and the world. This provides the farmer with a news service of their own. Mrs. Wyman asked Mr. Garland to address a paper concerning wills. Mrs. Wyman's address was greatly appreciated, many questions were asked and considerable discussion took place.

Lorna Nelson followed with a recitation. As the evening was late it was decided to hold over Mrs. A. F. Wilson's paper on "contests" until a later date. The meeting adjourned to meet on June 21st at the home of Mrs. Ethridge.

Wednesday, June 27th.

A resolution recommending unification of Canada's two great railways was passed after a lengthy discussion. The same will be forwarded to Prime Minister R. B. Bennett, Hon. W. L. McKenzie King, President Beatty, of the C.P.R. and to R. J. Garland, the local member of parliament. It was also decided to hold a public meeting under the auspices of the Board of Trade on this great question of railway matters, shortly after his return from Ottawa.

A report from the secretary disclosed that the sum of \$15 had been received from Mr. and Mrs. F. K. McKay, Calgary and Mrs. T. Henderson of Westmount, B.C., toward beautifying the town, which was gratefully acknowledged and put to the best use.

The publicity committee was instructed to see that Gleichen would be represented in the Calgary chuckwagon race with a Blackfoot outfit following a suggestion made last year by F. K. McKay. The name Gleichen is to be embodied in the entry. The Board then adjourned until the month of September when the body will meet again to consider winter activities in full.

LOCAL GOLF CLUB ENTERTAIN VISITING GOLFERS

The inter-town tournament between Bassano and Gleichen, the former as guests of the Gleichen Golf Club resulted in Gleichen winning both in the ladies' and the men's section. Nine wins were scored by the men and four by the ladies as against six for the Bassano men's club and two for the visiting ladies.

Dr. Keith and McDonald won from Dr. Scott and R. W. Harrison in a foursome event. J. Dowrie, Gleichen won from E. Hinton; John Boyd, Gleichen from A. Thompson; H. Harper, Bassano won from A. F. MacCallum; A. R. Yates, Gleichen won from H. Angell; Bob Harper, Bassano from M. Yates; C. G. Swain, Gleichen from W. Webb; E. P. Currie, Bassano from Geo. Gooderham; N. Purcell, Bassano from Ted Stiles; A. Mahony, Gleichen from J. Schmidt; Wm. MacCallum, Gleichen from D. Ford; Roy Gayford, Bassano from Bill Schmidt, Jr.; Harry Holmes, Bassano from Wm. Schmidt; E. Angell, Bassano from Jim Swain; Johnny Cook, Gleichen from Ted Stiles; A. Mahony, Gleichen from G. Foster; Fred Thompson, Bassano from M. Schmidt.

In the ladies section the following results were obtained: Mrs. MacCallum, Gleichen won from Miss M. E. McArthur; Mrs. Hinton, Bassano from Mrs. Gooderham; Mrs. Sather, Gleichen from Miss E. Hopkins; M. S. Strevens, Bassano from Mrs. Dowrie; Miss J. Cook, Gleichen from Mrs.

Refined Gasoline

CRYSTAL CLEAR AND ODORLESS FOR
15c per gallon

Plus tax, F.o.b. our Gleichen Warehouse

Elimination of costly duplicate handling whereby we haul direct from the Calgary refinery, makes a big saving which is passed on to our customers in the above price per gallon.

We also have ROYALITE NAPHTHA from Turner Valley, which is the best produced from that district at 12 1/2c per gallon plus tax

The entire event was most successful and favored by beautiful weather conditions

SCOUTS

Last week the meeting was held in the dining room of the Community Hall as the rain had made it impossible to hold the meeting in the park. There were 20 scouts present and also the Cubs and a few local citizens. The meeting opened in the usual manner with the Crows acting as duty patrol. A display of Scout work was then shown with the Owl Patrol specializing in signalling; the Pigeon Patrol in first aid, and the Fox Patrol in tenderfoot tests. Various badges were then presented by Assistant District Commissioner House. Each scout received a one year service star and a tenderfoot cloth badge. The Patrol leaders were given a button-hole badge and also another badge showing that they had successfully passed the examination based on the Patrol Leader's Training Course held in Calgary at Easter.

The following scouts received second class badges: Raymond Desjardine, Wilbert Lester, Bill Schmidt, and Eugene Lester. Lance was then awarded which the meeting closed.

Note: All Scout meetings during the examination period have been cancelled.

WILL BE IN GLEICHEN EVERY MONDAY At The McKay Hardware Good Watch, Jewellery and Clock Repairing A Complete Line of Jewellery in Stock At All Times P. B. DISCHER, Jeweller - - - Gleichen

ZANE GREY'S THE LAST ROUND-UP

Immortalizing in story and song the deeds of hard-fighting, quick-shooting men whose home was the saddle, whose life was the open range.

Based on Zane Grey's
Novel "The Border
Legion."

**MATINEE AT 3 P.M.
AT 7.30 AND 9 P.M.
NEWS COMEDY.**

GLEICHEN COMMUNITY HALL

The Gleichen Flour Mill

Sing a song of progress,
A bag full of wheat,
Four and twenty blackbirds
Scratched with their feet.

When the bag was opened,
The birds all gathered round,
Wouldn't it be nice stuff
If we only had it ground.

Then one little blackbird,
That lived up on the hill,
Said I tell you what we'll do boys,
We'll take it to the mill.

SOFTBALL RESULT

The local Scouts once again trimmed the Old Sun School to the tune of 15-3. Arthur Waterchief and Yellowfly played well for the Indians as did Woods and Desjardine for Gleichen. The batteries were: Old Sun School: McQuire, Yellowfly and Old Woman. Gleichen: E. Lester, D. Woods and B. MacCallum.

CONTROL OF INSECTS IN GARDENS

The numerous insect pests that invade our gardens each year in growing and destructive numbers makes garden insect control a live topic. This week's letter gives methods, outlined by George F. Manson, assistant entomologist of the Dominion Entomological Branch, Lethbridge, for some of our common garden insects.

There are two kinds of insects. One actually eats the plants while the other only sucks the juice from the plant tissue. The first, including potato beetles controlled by dusting or spraying the leaf surface with Paris green, arsenate of lime or lead arsenate. For the sucking insects, such as plant lice or aphids, the spray or dust must come in direct contact with the body and nicotine sulphate, kerosene emulsion or pyrethrum may be used.

Where both types of insects, biting and sucking, are present, the combination spray or dust is needed. A spray of this type, suggested by Mr. Manson, is Paris green or arsenate of lime, 2 tablespoonsful, and nicotine sulphate, 2 tablespoonsful, in a gallon of water containing enough soap to make good suds. If lead arsenate is used the quantity is doubled and the soap is omitted.

Some cutworms may be controlled by spreading a poison bait of bran 20 lbs, molasses 1 quart, Paris green half pound, water 2 or 3 gallons. This is more effective if the garden can be watered well or irrigated just previous to scattering the bait.

Root maggots of cabbage and onion (Continued on last page).

Quick Relief Now From Neuralgia

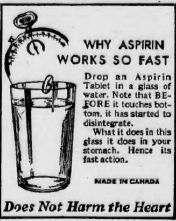

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia, etc., the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain in a few minutes after taking.

The illustration of the glass here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substituting a fake for you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Despite all the argument "about it and about," the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, compelling men to undertake hazardous expeditions to win it, inducing them to spend the best of their efforts to acquire it. Mirage or otherwise, it glides the horizon of new prophet and old priest, of poet and peasant, of rich and poor, of commoner and peer. Phantasm or reality—gold still is King.

These somewhat worn platitudes are evoked by the recent appearance in a financial journal, of two items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scrambling for gold," and the other "330,000,000 Buried by Pirates Sought". The one article denounces the hold which the gold tradition has upon world statesmen; the other optimizes the ingenuity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remained the world's monetary standard. Continuing it said:

"No government is abating its monetary policies in line with the dreams of the imaginative 'New School Economists'. Every government is recognizing the paramount necessity of return to a stabilized basis of international valuations. Shown this underlying sentiment, more clearly than the fact that every nation—even those which have suspended gold payments—is guarding the gold reserve against the central bank note issues as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1933, held the smallest gold reserve in more than a dozen years, it has subsequently added nearly \$350,000,000, bringing the reserve to the highest figure in its history. . . . The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value when even return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Ocoee Island treasure hunt. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately \$30,000,000 in gold ingots and a fortune in jewels, said to have been buried by pirates in or about 1849. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island"; such a map as allegedly may have been found tattooed on the chest of some old sailor in some Barbary Coast "dive". In this particular instance, the map came into possession of an Australian in 1900, who, it is said, visited the island and succeeded in removing some of the jewels. There, he subsequently buried—a peculiar enough action for which no reason is given. However, in March 5, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the loot—sand and coral. The drill went down through the sand, ground its way through the rough coral and rested on the gold. There is no rock off Tahiti and by the drills, we felt out the shape of the ingots and also able to determine the extent of the treasure. The drills spin on gold just as a top would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Floam and Jetam

Goods lost at sea and found floating are called floam. Goods thrown overboard or jettisoned, during a storm, or washed up from a wreck, are called jetam.

"They do not belong to the finder, even if he cannot trace the owner. They must be handed over to the Crown, and part of their value is paid in compensation."

More Than Satisfied

He had bought a barometer, and a fortnight later the instrument maker from whom he bought it passed the door.

"Well, are you satisfied with the barometer?" asked the instrument maker.

"Rather!" said the owner. "I have had it a fortnight, and we have had fine weather all the time."

The Great Zambesi Bridge

Remarkable Feat of Engineering In Heart Of Rhodesia

Spanning the Zambesi Gorge stands one of the highest bridges in the world.

This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambesi Bridge was a marvelous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they complained that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed and a train travelling at fifteen miles an hour was driven across to test its strength. The structure was painted grey so that whenever the materials rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer Who Recommended Churchill Was Noted Engineer

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he sent to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the north and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada via the sea.

For many years Sir Frederick was chief engineer of the Port of London Authority. He served as consulting engineer for many railways, both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer for the new \$22,000,000 Charing Cross bridge, London.

Recipe For Iced Tea

Use six heaping teaspoons of "Salsad" Black Tea. Brew tea in one pint of freshly boiled water for six minutes. Strain and pour liquid into a two quart container. While hot, add 1½ cups of granulated sugar and ½ of 2 lemons. The sugar or sir contents well, until sugar is fully dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water, otherwise liquid will become cloudy. This is recipe to serve in tall glasses with chilled ice or cubes. A slice of lemon may be added if desired. The above will make two quarts of iced tea, or seven tall glasses.

Soldiers Stayed In France

Over Thousand Americans Married And Made Home There

More than fifteen years after the bugles blew "cease firing," about 1,100 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures gathered by the American Legion Post show. More than half live in Paris; the rest are spread over forty-nine departments.

Willing To Co-operate

"Woman is very unreasonable," said a venerable New Hampshire justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said to my wife, 'we must both economize, both!' Very well," Henry, she said, with a tired air of submission, 'you shave yourself, and I'll cut your hair.'"

Fifty years in which to pay costs of the court, totalling \$750, has been given to an unsuccessful litigant, Bernard Kelly, a dock laborer in Liverpool.

BABY'S CRAMPS Banished!

"When I could not sleep at night with baby's cramps, it was Baby's Own Tablets that cleared the little system of offending substances and gave sweet sleep and rest. That is what Mrs. Robert Greenhorn, of St. Louis, writes me. Baby's Own Tablets are mild and soothing in action, yet most effective and always safe for colic, teething troubles, constipation, summer complaint, upset stomach, restlessness and simple fever. Price 25c everywhere."

Dr. Williams

BABY'S OWN TABLETS

Author Of "Beautiful Joe"

Miss Margaret Marshall Saunders Receives Recognition From The King

Smiling and happy at being named in the King's birthday honors list, 73-year-old Miss Margaret Marshall Saunders received many congratulatory messages from friends in Canada and the United States. She was named a Commander of the British Empire.

"The honor done me is as much an honor to the women members of the many clubs with which I have done humane work," said Miss Saunders, whose story of "Beautiful Joe," has been published in 14 languages, put into Braille and is now being translated to Japanese and Burmese. "It touches me much," she said, "that such a tribute should be given to the humane side of women's work."

Miss Saunders, who was born at Liverpool, N.S., did her first serious writing after she was 30 years old. She entered in a United States contest her "Beautiful Joe" as a companion story to "The Little Beauty," then a story published on behalf of humane work. Her entry won the prize and her work became known throughout the world.

Alter Colonial Sugar Duties

Britain Diverts West Indies Product Back To Canada

The British House of Commons has approved proposals contained in a white paper issued in April to alter the colonial sugar duties in such a way as to divert the flow of the commodity to Canada. The white paper, issued when the budget came down, would send sugar back to Canada from which it was driven when the pound sterling reached a premium in Canadian funds.

Even in value of the Canadian dollar allocated the sugar trade between the Dominion and the British West Indies and sent most of the commodity to the United Kingdom.

The New Style Bicycle

Velocor Allows Rider To Assume Semi-Horizontal Position

Rest when you cycle, may be the sales slogan of Stewart and Ernest Worrall, of Hamilton, Scotland, for their new invention, which they call the velocor. They promise a day's rest when the ordinary bicycle will take its place beside the bone-shaker as a relic of the past. The rider of the velocor sits in a semi-horizontal position, thus making it more comfortable than the ordinary bicycle. The handlebars stretch almost from the front to the back wheel. A recent race between velocorists and cyclists in Paris resulted in an overwhelming victory for the new machine.

Hurricanes On The Sun

May Cause Drought And Dust Storms Says Veteran Student

Swirling hurricanes on the sun may be the cause of droughts and dust storms in the Mid-West. These great solar storms, which appear to reach the earth in the form of solar rays, reaching an 11-year period of maximum intensity. Dr. C. G. Abbot of Smithsonian Institute, Washington, veteran student of the sun and long-range weather predicting, is confident they have a great effect on weather all over the earth. And "I would not say flatly that they have no connection with this drought in the Mid-West."

Don't Read This

Unless you are interested in a medicine which has helped over 700,000 women and girls. Take it before and after childbirth, as the Change or whenever you are nervous and rundown. 98 out of 100 say, "It helps!"

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Martyr To Radium

Last Of Scientists Who Aided Mme. Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 20th to die of the 20 scientists who aided Mme. Curie, discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by the mineral.

But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region remedied all danger of a monopoly in radium.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Fort's Stadium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cadillac ask \$100,000 expenditure to build a dam on the Frenchman river with a 15-mile main ditch south and east through foothills.

Alfalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmarie.

J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme developed to supplying about 250 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Canada Leads The Way

Comes First In Industrial Recovery According To League Figures

Canada leads the way in industrial activity. League of Nations figures for the first quarter of 1934, compared with the first quarter of last year, show these per centage increases in industrial activity:

Canada, 40 per cent; United States, 30 per cent; Germany and Poland, 25 per cent; Sweden, 18; Japan, 13; Norway, 6; France, 3.

Unemployment is decreasing in all the principal countries of the world except France.

World production of certain important commodities shows an appreciable increase, the figures also reveal. During the first quarter of 1934, production of coal increased by 10 per cent, of gasoline 12 per cent, pig iron 51 per cent, steel 54 per cent and zinc 37 per cent, in comparison with the same period of last year.

On the other hand the gold value of world trade again shows a decrease for the first quarter of 1934.

Fraudulent Stock Promotions

Government To Put Spoke In Wheel Of High-Pressure Salesmen

The House of Commons took the first step recently to spoke the work of high-pressure stock salesmen when it reviewed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through a prospectus, approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock canvasser or any organization that used a telephone and sucker list to promote sales. Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Marquis Kotohachiro Togo, the silent little man whose destruction of the Tsar's Russian fleet 20 years ago placed Japan among the great powers, died at Tokyo recently. At the age of 86 and with the rank of Japan's greatest hero, he surrendered to cancer of the throat.

Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral of the highest court rank.

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is around 28,500 miles per second.

Naturalists have discovered that spiders live to a ripe old age. Nevertheless their life often hangs on a thread.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This famous cathartic remedy has been on the market for the past 83 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milbrink Co., Ltd., Toronto, Ont.

33 Get exactly the color you want from the new Instant Rit range— instant, because it soaks right and STAYS— never leaves streaks or spots— and makes everything you use it on positively lovely.

YOU HAVE "BETTER LUCK" WITH RIT

NEW! No longer a soap! Dissolves instantly.

The Only Sure Way

Remove Money Support And Wars Would Naturally End

At a quiet meeting of the Church of England's Pension Fund Board, it was decided that an investment made forty years ago, and amounting to some fifty thousand dollars in stock of Vickers Limited should be liquidated, and the money placed in industrial stocks and bonds. The idea being that taking profits, for even the church, gained at the cost of life was not good business.

And from all parts of the globe the same talk is rising. Demonstrate war and you'll end it. The Vickers people, who represent the British Trust in Great Britain, held their annual shareholders' meeting recently and even those owning shares asked some rather pertinent questions along the line of just what part in causing trouble in foreign parts of the world did the British company play. The president admitted that advertisements were run in German papers which had good South American circulation, with the idea of attracting business from that continent, and particularly from Bolivia and Paraguay, both of whom are now at war. This didn't satisfy some of the shareholders who insisted that this advertising, in itself, didn't amount to any interference, but what these people wanted to know was, did the Vickers people or their agents subscribe to keeping alive feuds and talk of trouble that would breed war. The president replied in the negative and so all was straightened out, but it does show the gathering tendency to quiz the war interest folks.—Toronto Telegram.

No Doubt About It

Publisher Need Not Fear Editorials Are Not Read

The Sault Ste. Marie Star is jubilant because it found a young man who pretends to read the editorial page first. The editor declares this has knocked on the head one of his favorite theories—that nobody ever reads the editorials.

Most editorial writers, it is true, often wonder whether their faithful audience is real or imaginary. But being human, sooner or later they err or unconsciously trend on somebody's toes, though ever so lightly, and come to the sudden realization that they have not been talking to themselves.—Fort Erie Times-Review.

Found It Worked

What to do when the canary escapes from its cage and settles in the branches of a high tree: Turn a stream of water on the bird with a garden hose. Then the warblers return to earth with wings water-soaked and is easily recaptured. John Wadham, tried it at Marysville, Kansas, and it worked.

If the labor leader's pay stopped your wages, you wouldn't be urged to strike very often, says the Brandon Sun.

Swollen Joints

often are a warning that your kidneys have become damaged and in need of attention. Don't suffer needless pain. Take GIN PILLS to obtain relief and assist your kidneys to function properly.

Village Falling Into Decay

Findon Gave Name To Most Tasty Sea Food

A recent visitor to the village of Findon was distressed to find that a place which has given the name to one of the most tasty sea foods in the world, is falling into decay. Years ago it had a population of probably 500; today there are only 37 cottages occupied.

Findon, six miles south of Aberdeen on the Scottish North Sea coast, was the first place in the world where smoked haddocks were "invented." Rather were they discovered than invented, because like roast pig (if Lamb is to be believed) it was due to the burning down of a home. The fishing folks used to hang their haddocks up on the rafters of their homes for safe keeping, and the story is told that one day a house was burned down. There was no time to rescue any of the haddocks. When the fire was over, an old granmie wandered among the debris and her nostrils were enchanted by an unusual aroma. She could not make out what smelled so nice, but she noticed that the haddocks had assumed an attractive brown color. She took hold of one and picked a piece off. It was so good she took another piece, then called the family to taste. They were charmed with the new flavor, and so the first of smoked haddocks was born.

After that, the fisher folk of Findon "smoked" their fresh haddocks with peat or sawdust fires. In time the kiln was devised, and "Findon haddocks" became famous. The people of Findon is "Finan", and so "Finan haddocks" are known the world over as the name for smoked haddocks.—St. Thomas Times-Journal.

Sales People Are Wise

Know Men Purchase Beauty Aids For Own Use

When it comes to beauty preparations men-to-day are at the same stage as women were in regard to smoking about 10 years ago, remarked Miss Pearl Clarke, before members of the Business and Professional Women's Club at Montreal.

A few years ago a member of the fair sex would slip into a corner tobacco store hoping she wouldn't be noticed by any of her friends and shyly order a package of cigarettes, murmuring something about them being for her brother. Yet the world would hurry home to smoke them herself.

Now a man summons all his courage, makes his way to a counter in the toiletry department of a store and asks for a box of powder, an astringent and probably a jar of cold cream. He stands looking about uneasily at the saleslady returns with his parcel praying no one will come along who knows him. When the saleslady is alone he adds to him he ministers a few words to the effect he is sure his wife will like these beauty preparations and then gets under way as quickly as possible. Of course, he uses them himself, Miss Clark added.

There is no knowing to what length men will go in the use of beauty preparations, the speaker added, but she believed the day was not distant when they would use lipstick, mascara and eye-shadow. Men, however, added, do not intend to let women monopolize the sense of well-being that goes with the healthy well-kept skin.

Weather Becoming Warmer

Statistics Show Temperatures In United States Higher In Past Ten Years

If this thing keeps up there'll be a hot time in the United States a few hundred years from now. The Smithsonian Institution produced statistics showing the weather has been growing warmer for years.

The figures deal with the years 1921 to 1930. They show that at weather bureau stations all over the United States the mean temperature during the 10 years was from a fraction to one degree warmer than the mean for all the previous years on record.

Neither the Smithsonian Institution nor the weather bureau offered any explanation.

Germany's New Zeppelin

The new zeppelin, which is under construction in Friedrichshafen, Germany, will carry the equivalent of a two-story building, with 20 bedrooms, a dining room 45 feet long, and baggage room large enough to hold automobiles. The craft will be 660 feet long and more than 120 feet wide at the centre.

One of San Francisco's municipal courts sets aside three days a week as Chinese days; on those days all defendants in the court are Chinese.

Errors Of Artists

Expert Critics Find Many Mistakes That Are Absurd

An artist invited his neighbour, a market-gardener, into his studio, and, pointing in front of a large canvas, said: "How do you like this picture of Adam and Eve?"

The visitor studied it intently for a few minutes.

"Very much," he said at last, "but—"

"Well, what?" inquired the artist. "Oh, nothing particular," was the reply, "only you've placed in Eve's hand a variety of apple which has only been produced during the last twenty years."

The carpenter is always a harsh critic. Every year the tailoring press criticizes the blunders of R.A.'s but if time could be reversed what would the ancient Egyptians say to Pharaoh's daughter and her maids of honour, in "The Finding of Moses," directed in the latest "confections" of the First Empire of France?

Perhaps it is not often that a farmer turns into Burlington House to see the Royal Academy pictures of the year, but it is on record that on one of these rare occasions the jolly farmer stood before a large picture of the Prodigal Son, where he was represented "feeding swine." There they were a dozen of them, all gobbling out of a log trough, and the farmer went in of his laughter.

"Well, I'll be hanged!" he spluttered to another bystander, "did you ever see a lot of pigs feeding and not one of them with its feet in the trough?"

As with novellists, the moon has been a source of trouble to artists. One of them recently painted a crescent moon in the eastern sky directly opposite the setting sun—an astronomical absurdity. Yet he refused to alter it when the error was pointed out, saying that to place the moon anywhere else would ruin the balance of his picture.

Probably few observers would have noticed that a famous artist had painted a rainbow in the reverse order of the spectrum. The picture was purchased from the walls of the R.A. exhibition, no critic having noticed the error, and the purchaser lived in ignorance of it until it was pointed out by a scientific friend. The rainbow was upside down.

Guns are a prolific source of artist's bowlers. One of the older ones shows the escaping Israelites marching across the floor of the Red Sea with muskets on their shoulders, and a seventeenth-century carving of exquisite workmanship shows the Gold Samaritan on the Jericho road, one of his servants carrying a gun. A Spanish artist shows Abraham about to shoot his son Isaac with a pistol in place of using the scriptural knife.

Find White Coral Reef

Chicago Geology Students Report Discovery In Lake Michigan

Lake Michigan's water level was uncommonly low in a recent week. Trooping along the shore near Chicago, a bevy of geology students from Central Y.M.C.A. College of Arts and Sciences were so surprised to see parts of a submerged reef well known to chartmakers jutting a few inches above water that they waded out to chip off samples. When they brought back their specimens to instructor James H. Glasgow, University of Chicago graduate student, he stared at the stuff, decided it was white coral, sent it to university geologists who confirmed his opinion.

Divers were sent to survey Lake Michigan's coral reef. It parallels the shore for 1,500 feet, is flat on top, evidently shaved off by Pleistocene glaciers. Mr. Glasgow ascribed it to the Silurian period—400,000,000 years ago.

At that time the U. S. Midwest was covered by a broad key of the ocean reaching up from what is now Central America, as numerous marine fossils found in the region testify. Lake Michigan's coral is the farthest north ever found.—From Time.

Toll Of World War

Figures Relating To Dead And Missing Hard To Grasp

How many Lusitanians would have to go down to carry all the dead and missing soldiers and the dead civilians of the great World War? One Lusitania a day for 70 years, or one a week, beginning nearly a century before the discovery of America by Columbus and continuing to the present hour. That is the number of Lusitanians that would be required to carry the dead. The dead of all nations who died in the war.—From Liberty.

The least expensive substitute for gasoline is shoe leather.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werner's Powder is the world's largest seller and prescribed by leading dentists: it holds (that day long you forget you wear false plates. Leaves no colored, gummy marks—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any druggist.

The Ingenious Asiatic

Japanese Are Great Inventors And Stop At Nothing

Everybody knows that the Japanese are a wonderful people, but few of us understand just how wonderful they really are. Every day brings new proof. Virginia tobacco growers, according to a Times dispatch from Darville, are greatly disturbed by the threat of an invasion Virginia cigarette made from native Japanese tobacco and flavoured with a German extract from cheap Virginia leaf.

The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and gramophones are now initiating Nature's work in our Piedmont tobacco fields.

Where will they stop? The prevalent impression is that they will stop at nothing. Universal unemployment threatens the nations because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton, and French champagne, and Mexican tamales, and Brazilian coffee, and Australian wool.

In every industrial trouble anywhere in the world to-day the motto is "Cheer up, Japan!" From the size of the Japanese "manace" there must be about 800 million Japanese and each one of them must be as clever as a thousand devils.—New York Times.

THE RHYMING OPTIMIST

By Aline Michaelis

A SINGLE PAGE

"What shall I do with my life?" you say.
"With the years that are coming,
And while you wonder, life slips away!"

Life is a road that stretches far,
Glad years finished, brave years that
End years yet to be, each aglow like a star!

The road goes winding, goes flowing by,
From east to west and from sky to
The road where your love and your
telling lie.

It wanders and reaches from rim to rim
Of far horizons, uncertain, dim,
And no man knows what it brings to him.
Though your road for year after year
You can trace,
Through a strange and lovely place,
You can shape it for only a single page.

All of life that is given to any man
To fashion after his hopes' prying plan
Is a breath's brief space, is a foot-
step's span.

Must Stop Smoking

Chinese Students Are Ordered To Quit Cigarettes

A strict ban on cigarette smoking by Chinese students has been ordered by the Nanking ministry of education. A circular mandate has been sent to all provincial educational bureaux saying smoking by students must be stopped at once.

Since nearly all Chinese smoke, men and women and even little girls and boys of first-grade age, the order will be very difficult to enforce.

A large number of varieties and species of plants in Canada contribute to the formation of peat and muck deposits. These plants for the most part are aquatic or semi-aquatic; that is, they grow under in water, or at least flourish in saturated or water-logged soil.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary
For you to be healthy and happy your liver must pour two pounds of liquid bile into your system every day. If you neglect this, you will feel wretched. You can expect to clear up a situation like this with the help of the Bile Beans, oil, mineral water, laxative candy or any other medicine. But the Bile Beans will do it for you.

Dr. Williams' Little Liver Pills. Purely vegetable. Safe, quick and sure results. Ask your druggist. Refuse imitations. 25¢ a package.

Electric Light For Lhasa

British Firm Permitted To Do Work In "Forbidden City"

Lhasa, the forbidden—and forbidding—city of Tibet will shortly be lighted by electricity. English mechanical and English workmen, who are used to going into remote and backward parts of the world with civilizing machinery, are going to Lhasa to carry out the job.

The transportation of the equipment will be one of the most difficult tasks ever undertaken by a British firm. Hundreds of tons of material and machinery will have to be carried over 400 miles of some of the most mountainous and almost trackless terrain in the world by mules and porters, aided in some places by yaks which are the only animals that can live at an altitude of 17,000 feet over which the caravan will have to go. More than 2,000 mules will be used to transport the material, which will then be assembled and set up in Lhasa.

The forbidden city is not quite so forbidden as it was recently, but it must have given the monks who rule the city of 30,000 people much misgiving before they gave consent to a British firm to do this work. Probably it took years of persuasion to obtain that consent. Lhasa is the most priest-ridden city in the world, and the lamas are opposed to modernization, their rule being built on a fabric of superstition.

No white man has ever visited the place until an Englishman named Thomas Manning found his way there in 1911, and no other man ever reached there until the British sent an expedition in 1904. Since then only a comparatively few have penetrated the fastness, and even to-day it is a city of dirt and squalor, utterly without modern conveniences. This may be the first step in the modernization of Lhasa.—St. Thomas Times-Journal.

Forgotten By Time

Lost Race Of Primitive Savages Found On Pacific Island

Mrs. Zita Baker, a young British woman, has returned to England stricken with malaria after spending four enduring months among a "lost race" of savages.

Mrs. Baker is the wife of Dr. John R. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford University Exploration Club. "Some of the islanders," said Mrs. Baker, "had never before been explored by white men. The natives were among the most primitive aborigines—a race forgotten by time."

"I used to go out with the women to cultivate the fields in the daytime. At night I slept with them in their huts. Often there would be as many as eight women to one hut. "Firearms were unknown on the island, and the men had to hunt with bows and arrows."

Latest Thing In Elevators

Worries Perfectly Without Any Direction From Human Hand

The latest thing in elevators arrives at your floor in response to your signal; opens its doors, closes them; goes on with its business of collecting passengers at other floors, repeatedly opening its doors and closing them, without direction from human hand. If you happen to feel it, it's an interesting sensation to find yourself in the hands and apparently at the mercy of a giant without conscience, pity, or any regard for its human charges. But if no appeal is possible, neither is there cause for complaint. And after a few trips you consign yourself to the machine without a quiver, serene in the realization that not all robots are Frankentekins.—Christian Science Monitor.

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling

A well-known Toronto dentist the other day had a lady come in to have a gold filling put in her tooth. "I'd like to supply the gold," says the lady. "Well, we don't as a rule—," he began. "Oh, but I really want to supply the gold," she says winningly. He gives in and goes ahead with the mold. Next day she trots in with a wedding ring.

"It's only 14 carat and we usually use about 22," he explains. But she gets her point. "I'm going to be married tomorrow again," expands the lady. "This is my first wedding ring, and if I have it in my tooth I can still wear it without my second husband knowing anything about it." The dentist socked the yellow metal home.

It takes a woman of decision to become a decided blunder.

ARM IN SLING WITH NEURITIS

A "token of gratification" this woman says she is giving when she writes of her relief from neuritis.—"For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have received from Kruschen Salts. This has all happened in two weeks, and I am optimistic enough to think that in another fortnight I shall have said good-bye to neuritis once and for all. Call this a testimonial if you choose—to me it is a token of gratification."—(Mrs.) N. E. L. Neuritis is a result of impurities in the blood, and it impairs blood circulating all over the system and setting up inflammation in the tissues that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy; I dwell in the high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah 57:15.

Without an end or bound
Thy life lies all outspread in
light!

Our lives feel Thy life all around,
Making our weakness strong, our
darkness bright.
Yet it is neither wilderness or
sea.

But Thy calm gladness of a full
eternity. —F. W. Faber.

O Truth who art Eternity; And
Love who art Truth; And Eternity
who art Love; Thou art my God, to
Thee do I sigh day and night. When
I first knew Thee Thou lifted me
up that I might see there was some-
thing for me to do in Thy world.
I was not yet such as to see. And Thou
streaming forth Thy beams of light
upon me most strongly didst heat
back the weakness of my sight and
I trembled with love and awe, and
I perceived myself to be far off from
Thee in the region of unlikeness.—St.
Augustine.

Had Excellent Memory

Armb Wernan, Oldest In Holy Land, Died Recently

The oldest woman in the Holy Land has died at the age of 112. She was a Christian Arab living at Bethlehem. Until a year ago, her health was excellent. Her relatives state that she distinctly remembered the time, about 1840, when a British fleet assisted the Sultan of Turkey in driving out the Egyptians from Palestine. The fleet then bombarded some of the coast towns, and forced Ibrahim Pasha and his army to evacuate the Holy Land after a nine-year occupation.

Gossips might appropriately be termed misfortune tellers.
